

Project ECHO® OBN

Update Your Knowledge on Post Bariatric Care and Obesity Management

Managing the care of patients after bariatric surgery or the care of patients who are living with obesity can be complex.

Project ECHO OBN is an interdisciplinary model that revolutionizes medical education and increases provider capacity to provide best-practice specialty care through networks of healthcare providers across the province.

Join one of our knowledge sharing networks with other primary care providers and specialists from the Bariatric Centres of Excellence (BCoE) to share best practices and discuss cases using videoconferencing technology.

Benefits:

Earn no cost continuing medical education (CME) credits.

Receive mentorship from a team of obesity management specialists.

Easily join from your desk using your computer or smartphone.

Learn About...

- Changing practices in the surgical and medical management of patients with obesity
- BCOE and primary care collaboration to implement the Shared Care Model
- Obesity related co-morbidities and treatment options
- Evidence based approaches to effectively manage patient complications
